

**Free collection**  
**Easy disposal**  
**Contribution to environmental protection through recycling**

# HIRSCH:REuse

An initiative of the HIRSCH Servo Group to make the world a more conscious place.

## It's that simple

Collect clean packaging or construction EPS (produced as of 2016) and place in the free HIRSCH:REuse bags.

We regularly pick up the filled HIRSCH:REuse bags and bring them to our plant in Glanegg free of charge.

We recycle the EPS and give the valuable raw material a new life as an efficient HIRSCH insulation product.

## What can be put in the bags

- + **Pure packaging EPS** without labels, adhesive tape or other packaging materials
- + **Pure building EPS** offcuts, residual material without coatings or foreign material adhesions

- **Soiled packaging EPS**, such as fish boxes
- **Construction EPS**, older than 2016
- **Packaging and insulating materials made of XPS**, such as meat and fruit cups
- **Other foams**, such as PE, PP or PU

You have questions or would like to order the HIRSCH:REuse bags?
